STANDARD'S BILL EXCHANGER (BX & BCX) SERIES AVAILABLE WITH 1 & 2 NOTE FUJITSU BILL DISPENSERS

(Indianapolis, IN) – Standard Change-Makers, Inc., a leading manufacturer of currency change machines, is pleased to announce their Bill-to-Bill (BX) and Bill-&-Coin (BCX) Exchangers are available with either the single note or dual note Fujitsu™ Bill Dispenser. Rear Load versions are shipping now, and Front Load versions will begin shipping in December, 2006.

The Bill Exchanger Series machines consist of the Bill-to-Bill Exchangers (models beginning with BX) and the Bill-and-Coin Exchangers (models beginning with BCX). The BX Series machines simply break higher denominations into lower denominations. For example, \$20 bills can be broken into four \$5 bills in a single note machine, or three \$5 bills and five \$1 bills in a dual note machine. In the BCX Series machines, you can break the larger denominations into a combination of bills (\$5 and/or \$1) and coins (dollar coins and/or quarters).

A unique feature of the new products is our "Always Transfer" feature. This allows the machine to make the best change available in order to complete the transaction. For example, if you run out of \$5 bills in a dual note dispenser, the Always Transfer feature would substitute \$1 bills to complete the transaction. Likewise, if you ran out of \$1 bills it would substitute quarters or dollar coins (if available). The machine will automatically use the available dispensers to fulfill the transaction.

"Combining the Fujitsu™ bill dispenser with our existing UniNote™ products just enables us to provide more versatility in our Bill Exchanger product line." reports Mike Coons, National Sales Manager. "Whether owners are looking to dispense one or two different denominations, or combinations of one or two bills and up to two different coins or tokens, they have a lot more flexibility in providing convenience for their customers, and that translates into more revenue-generating opportunities for their businesses."
