# **STANDARD ANNOUNCES PRODUCT PRICE INCREASE EFFECTIVE JANUARY 1, 2012**

(Indianapolis, IN) – Standard Change-Makers, Inc., a leading manufacturer of currency change machines, announces a price increase on its line of currency change machines effective January 1, 2012. This price increase will affect the Modular (MC), System 600 (SC) and Bill Exchanger (BX/BCX) change machines.

In addition to the price increase, Standard will discontinue selling the Bill Exchanger (BX/BCX) Series machine that uses the UniNote™ bill dispenser. This would include the BX1000 & BX1000RL, BCX1000, BCX1000RL, BCX2000 & BCX2000RL. The BX/BCX product line will continue with the Fujitsu™ bill dispenser models. Standard Change-Makers Service Department will continue to service and support the UniNote machines that are in operation throughout the country.

The reason for the price increase is our decision to include the Coinco™ Vantage bill acceptor as the default bill acceptor in the Modular (MC) Series products. This decision was made to improve the “out of box” reliability and long-term productivity of our changers. The Bill Exchanger (BX/BCX) Series machines will continue to be provided with the MEI (Mars™) bill acceptors at the default acceptor.
