800-968-6955 Phone: 317-899-6966 Fax: 317-899-6977

Rear Load

The new MC315RL-CC is a versatile rear load change machine that accepts credit cards and dispenses tokens. This new design features an LCD display that offers instructions and feedback to the customer and 4-Button Package payouts, or 3-Button Pulse payouts in which the owner can customize the price and number of tokens dispensed.

In addition, the MC315RL-CC has a weather-proof card reader that has two-way mag stripe recognition, and one (1) Modular Series Hopper that holds 5,200 (\$1,300) quarter-sized tokens. The machine is monitored and controlled by the Expanded Function Module. This EF Module gives the owner the ability to re-program his payout packages, check the transactions and audits, and program the optional Receipt & Audit Printer. The new credit card machines work on dial-up Host processing, using the DataTran 162SL POS Terminal device. High-speed internet Host processing is also available for cable-modem or DSL lines.

Accepting credit card payments has never been easier! With the MC315RL-CC, you'll have more flexibility in providing payment options, more satisfied customers and increased revenues.

Height	Width	Depth	Shipping Weight	Changes
32	9	15	110 lbs.	Credit Cards
Number of Hoppers	Number of Validators	Stacker Capacity
